0 Motivation

- *Proof-Based Math Readings* is a free and independent online reading group where we study mathematics required in economics master's/PhD programs using an intuitive approach.
- This session of the reading group is on *Bayesian Statistics*.

1 Prerequisites

- CGPA: 3.00/4.00.
- Proof and Statistics books/playlists below are the prerequisites for this session.
- Please use the Application Form to join our reading group anytime.
- Applicants are informed about their application results within a week via email.

2 Format

- This session takes 12 weeks.
- We discuss the topics/exercises that we struggle with at Proof-Based Math Readings [Discord].
- We do not have face-to-face/online meetings due to the size of the group.
- Members are expected to read the chapters, and watch the chapter videos from the book's playlist.

3 Resources

3.1 Main Book

Bayesian Econometrics - Gary Koop (2003) is our main book for this session because it is well-written and well-structured.

- Bayesian Econometrics - Gary Koop (2003)
- Bayesian Econometrics - Gary Koop (2003, Errata)

3.2 Supplementary

3.2.1 Proof

- Book of Proof - Richard Hammack (3.3 Edition, 2022)
- Book of Proof - Richard Hammack (3.3 Edition, 2022, Companion playlist by Jeremy Teitelbaum)
- Book of Proof - Richard Hammack (3.3 Edition, 2022, Companion playlist by Michael Penn)

3.2.2 Statistics

- Introduction to Probability - Dimitri P. Bertsekas, John N. Tsitsiklis (2nd Edition, 2008, Summary Material)
- Introduction to Probability - Dimitri P. Bertsekas, John N. Tsitsiklis (2nd Edition, 2008, Playlist)
- Introduction to Probability - Dimitri P. Bertsekas, John N. Tsitsiklis (2nd Edition, 2008, Solutions & Errata)

3.2.3 Bayesian Statistics

- Bayesian Econometric Methods - Joshua Chan, Gary Koop, Dale Poirier, Justin Tobias (2nd Edition, 2019)
- Bayesian Econometric Methods - Joshua Chan, Gary Koop, Dale Poirier, Justin Tobias (2nd Edition, 2019, Errata)
- Bayesian Data Analysis, - Andrew Gelman, John Carlin, Hal Stern, David Dunson, Aki Vehtari, Donald Rubin (3rd Edition, 2022)

4 Reading Schedule

BE is the abbreviation of **Bayesian Econometrics - Gary Koop (2003)**.

BE **Week 01**

Appendix A: Introduction to Matrix Algebra
Appendix B: Introduction to Probability and Statistics
1: An Overview of Bayesian Econometrics

BE **Week 02**

2: The Normal Linear Regression Model with Natural Conjugate Prior and a Single Explanatory Variable

BE **Week 03-04**

3: The Normal Linear Regression Model with Natural Conjugate Prior and Many Explanatory Variables

BE **Week 05-06**

4: The Normal Linear Regression Model with Other Priors

BE **Week 07-08**

5: The Nonlinear Regression Model

BE **Week 09-10**

6: The Linear Regression Model with General Error Covariance Matrix

BE **Week 11-12**

7: The Linear Regression Model with Panel Data
