## 0 Motivation

- *Proof-Based Math Readings* is a free and independent online reading group where we study mathematics required in economics master's/PhD programs using an intuitive approach.
- This session of the reading group is on *Optimization*.

## 1 Prerequisites

- CGPA: 3.00/4.00.
- Proof resources below are the prerequisites for this session.
- Please use the  [Application Form](#) to join our reading group.
- Applicants are informed about their application results within a week via email.

## 2 Format

- This session takes 12 weeks.
- We discuss the topics/exercises that we struggle with at  [Proof-Based Math Readings \[Discord\]](#).
- We do not have face-to-face/online meetings due to the size of the group.
- Members are expected to read the chapters from the book.

## 3 Resources

### 3.1 Main Book and Main Book's Playlist

**A First Course in Optimization Theory (1996)** by Rangarajan K. Sundaram is our main book because it is well-written and well-structured.

-  A First Course in Optimization Theory - Rangarajan K. Sundaram (1996)
-  [A First Course in Optimization Theory - Rangarajan K. Sundaram \(1996, Solutions by Frederick Robinson\)](#)
-  A First Course in Optimization Theory - Rangarajan K. Sundaram (1996, Solutions by Paolo Pin)

### 3.2 Supplementary

#### 3.2.1 Optimization

-  [Foundations for Optimization - Mark Walker \(2020\)](#)
-  [Optimization - Mark Walker \(2020\)](#)

#### 3.2.2 Proof
