## 0 Motivation

- *Proof-Based Math Readings* is a free, independent online reading group where we study the mathematics required for economics master's and PhD programs through an intuitive approach. Active since May 2023.
- This session of the reading group is on *Proof Techniques*.

## 1 Prerequisites

- Calculus resources below.
- Please use the  **Application Form** to join our reading group; you will receive a response within a week.

## 2 Format

- This session takes 12 weeks. We do not have face-to-face/online meetings due to the size of the group.
- Members read the main book and discuss the topics/exercises in the Proof-Based Math Readings Discord .

## 3 Resources [All are open-access]

### 3.1 Main Book and Main Book's Playlist

**Book of Proof - Richard Hammack (3.4 Edition, 2025)** is our main book because it is a well-written and well-structured pedagogical masterpiece. It is also open-access and provides detailed solutions for odd-numbered exercises at the end of the book.

Jeremy Teitelbaum's playlist on Book of Proof is our main playlist because his narrative is great.

 [Book of Proof - Richard Hammack \(3.4 Edition, 2025\)](#)

 [Book of Proof - Richard Hammack \(3.4 Edition, 2025, Playlist by Jeremy Teitelbaum, Chapters 1-12\)](#)

### 3.2 Supplementary

#### 3.2.1 Proof Techniques

Because our main playlist does not cover Chapters 13-14, we cover these chapters from Michael Penn's playlist.

 [Book of Proof - Richard Hammack \(3.4 Edition, 2025, Playlist by Michael Penn, Chapters 1-14\)](#)

 [Book of Proof - Richard Hammack \(3.4 Edition, 2025, Playlist by Valerie Hower, Chapters 1-12\)](#)

 [Book of Proof - Richard Hammack \(3.4 Edition, 2025, Workbook by Justin Wright\)](#)

 [Appendix A: Elements of Style for Proofs - Dana C. Ernst \(2025\)](#)

#### 3.2.2 Calculus

 [Essence of Calculus - 3Blue1Brown \(2023\)](#)

  [Single Variable Calculus - David Jerison \(2006\)](#)

  [Multivariable Calculus - Denis Auroux \(2007\)](#)

 [Sequences and Series Calculator - Geogebra](#)

 [Function Graph - Geogebra](#)

## 4 Reading Schedule

I recommend the following study routine:

- 1) First, read a chapter from the book, then watch the corresponding playlist.
- 2) Solve the odd-numbered exercises and check their solutions at the end of the book.
- 3) Solve the even-numbered exercises and check their solutions using our unofficial solutions manual.
- 4) If you cannot solve or understand an exercise, discuss it in our Discord.
- 5) Then, move on to the next chapter.

 <b>Book of Proof</b>	<b>Week 01</b> 
Chapter 1: Sets Chapter 2: Logic Chapter 3: Counting	
 <b>Book of Proof</b>	<b>Week 02-03</b> 
Chapter 4: Direct Proof Chapter 5: Contrapositive Proof Chapter 6: Proof by Contradiction	
 <b>Book of Proof</b>	<b>Week 04-05</b> 
Chapter 7: Proving Non-Conditional Statements Chapter 8: Proofs Involving Sets Chapter 9: Disproof	
 <b>Book of Proof</b>	<b>Week 06</b> 
Chapter 10: Mathematical Induction	
 <b>Book of Proof</b>	<b>Week 07-08</b> 
Chapter 11: Relations Chapter 12: Functions	
 <b>Book of Proof</b>	<b>Week 09-10</b> 
Chapter 14: Cardinality of Sets (This chapter requires a solid understanding of Chapter 12)	
 <b>Book of Proof</b>	<b>Week 11-12</b> 
Chapter 13: Proofs in Calculus (This chapter is denser than the previous ones)	

## 5 Further Readings (Optional)

-  Mathematical Proofs A Transition to Advanced Mathematics - G. Chartrand, A. Polimeni, P. Zhang (Chapters 0-14, 4th Edition, 2018)
-  Mathematical Proofs A Transition to Advanced Mathematics - G. Chartrand, A. Polimeni, P. Zhang (Chapters 0-14, 4th Edition, 2018, Slides)
