0 Motivation

- *Proof-Based Math Readings* is an independent online reading group.
- The goal of the reading group is to understand mathematical concepts required in the economics master's/PhD programs with an intuitive approach.
- This session of the reading group is on *Real Analysis*.

1 Prerequisites

- CGPA: 3.00/4.00 and **Book of Proof - Richard Hammack (3.3 Edition, 2022)**.
- Please apply by uploading your CV and transcript to this  [Google Form](#) until 23:59, 28 July 2023. Please upload your CV and transcript as **NameSurname.pdf**, not **CV.pdf**. Students who applied will be informed about their application result via email at 10:00, 30 July 2023.

2 Format

- This session will last 12 weeks from 31 July 2023 to 22 October 2023.
- We will discuss the topics/exercises that we struggle with at  [Proof-Based Math Readings \[Discord\]](#).
- We will not have face-to-face/online meetings due to size of the group.
- Members are expected to read the chapters, and watch the chapter videos from the book's playlist.

3 Resources [All are open-access]

3.1 Main Book and Main Book's Playlist

Basic Analysis: I Introduction to Real Analysis [Volume I] by Jiri Lebl is our main book for this session because it is well-written, well-structured, and open-access.

Casey Rodriguez's playlist is our main playlist because his narrative is just great.
