0 Motivation

- Proof-Based Math Readings is a free and independent online reading group where we study mathematics required in economics master's/PhD programs using an intuitive approach.
- This session of the reading group is on *Proof Techniques*.

1 Prerequisites

- CGPA: 3.00/4.00
- Please use our **O** Application Form to join our reading group anytime.
- Applicants will be informed about their application results within a week via email.

2 Format

- This session will last 6 weeks.
- We will discuss the topics/exercises that we struggle with at Proof-Based Math Readings [Discord].
- We will not have face-to-face/online meetings due to the size of the group.
- Members are expected to read the chapters, and watch the chapter videos from the book's playlist.

3 Resources [All are open-access]

3.1 Main Book and Main Book's Playlist

Book of Proof by Richard Hammack is our main book because it is a well-written and well-structured pedagogical masterpiece. It is also open-access and provides detailed solutions for odd-numbered exercises at the end of the book. Jeremy Teitelbaum's playlist on Book of Proof is our main playlist because his narrative is just great.

- Book of Proof Richard Hammack (3.3 Edition, 2022)
- Book of Proof Richard Hammack (3.3 Edition, 2022, Companion playlist by Jeremy Teitelbaum, Chapter 1-12)

3.2 Supplementary

3.2.1 Proof

In case we need to watch a proof topic from another instructor, we have 2 additional companion playlists. Because our main playlist does not cover Chapter 13-14, we will cover these chapters from Penn's playlist.

- Book of Proof Richard Hammack (3.3 Edition, 2022, Companion playlist by Michael Penn, Chapter 1-14)
- Book of Proof Richard Hammack (3.3 Edition, 2022, Companion playlist by Valerie Hower, Chapter 1-12)
- Book of Proof Richard Hammack (3.3 Edition, 2022, Companion workbook by Justin Wright)

3.2.2 Calculus

In case we need to remember a topic from calculus, we can use these playlists.

- Essence of Calculus 3Blue1Brown (2023)
- Single Variable Calculus David Jerison (2006)
- Multi Variable Calculus Denis Auroux (2007)
 - Sequences and Series Calculator Geogebra
 - Function Graph Geogebra

4 Reading Schedule

I recommend the study routine below:

- 1) Read a chapter from the main book.
- 2) Watch the main playlist of the chapter.
- 3) Solve odd-numbered exercises and check their solutions at the end of the main book.
- 4) Solve even-numbered exercises in the main book.
- 5) If you cannot solve/understand an exercise, discuss the exercise in our Discord server.
- 6) Move on to the next chapter of the main book.

₩eek 01

- Book of Proof, Chapter 1: Sets
- Book of Proof, Chapter 2: Logic
- Book of Proof, Chapter 3: Counting

₩ Week 02

- Book of Proof, Chapter 4: Direct Proof
- Book of Proof, Chapter 5: Contrapositive Proof
- Book of Proof, Chapter 6: Proof by Contradiction

₩ Week 03

- Book of Proof, Chapter 7: Proving Non-Conditional Statements
- Book of Proof, Chapter 8: Proofs Involving Sets
- Book of Proof, Chapter 9: Disproof
- Book of Proof, Chapter 10: Mathematical Induction

₩ Week 04

- Book of Proof, Chapter 11: Relations
- Book of Proof, Chapter 12: Functions

⊞ Week 05-06

- We first read Chapter 14, then Chapter 13. These chapters are more challenging than the previous ones.
- Book of Proof, Chapter 14: Cardinality of Sets
- Book of Proof, Chapter 13: Proofs in Calculus

5 Further Readings (Optional)

We can use the following book to solve more problems. Although the book is not open-access, its official slides are.

- Mathematical Proofs A Transition to Advanced Mathematics Gary Chartrand, Albert D. Polimeni, Ping Zhang (Chapter 0-14, 4th Edition, 2018)
- Mathematical Proofs A Transition to Advanced Mathematics Gary Chartrand, Albert D. Polimeni, Ping Zhang (Chapter 0-14, 4th Edition, 2018, Slides)
