0 Motivation

- Proof-Based Math Readings is an independent online reading group where we study mathematics required in economics master's/PhD programs using an intuitive approach.
- This first session of the reading group is on *Proof Techniques*.

1 Prerequisites

- CGPA: 3.00/4.00
- Please apply by uploading your CV and transcript to this **G** Google Form until 23:59, 04 June 2023. Please upload your CV and transcript as **NameSurname.pdf**, not **CV.pdf**. Students who applied will be informed about their application results via email at 10:00, 06 June 2023.

2 Format

- This session will last 5 weeks from 12 June 2023 to 16 July 2023.
- We will discuss the topics/exercises that we struggle with at Proof-Based Math Readings [Discord].
- We will not have face-to-face/online meetings due to size of the group.
- Members are expected to read the chapters, and watch the chapter videos from the book's playlist.

3 Resources [All are open-access]

3.1 Main Book and Main Book's Playlist

Book of Proof by Richard Hammack is our main book because it is a well-structured pedagogical masterpiece. It is also free and provides detailed solutions for odd-numbered exercises at the end of the book.

Jeremy Teitelbaum's playlist on Book of Proof is our main playlist because his narrative is just great.

- Book of Proof Richard Hammack (3.3 Edition, 2022)
- Book of Proof Richard Hammack (3.3 Edition, 2022, Playlist to main book, Jeremy Teitelbaum)

3.2 Supplementary

3.2.1 **Proof**

In case we need to watch a proof topic from another instructor, we have 2 additional companion playlists. Because our main playlist does not cover Chapter 13-14, we will cover theese chapters from Penn's playlist.

- Book of Proof Richard Hammack (3.3 Edition, 2022, Companion playlist by Michael Penn, Ch 1-14)
- Book of Proof Richard Hammack (3.3 Edition, 2022, Companion playlist by Valerie Hower, Exams)
- Book of Proof Richard Hammack (3.3 Edition, 2022, Companion workbook by Justin Wright)

3.2.2 Calculus

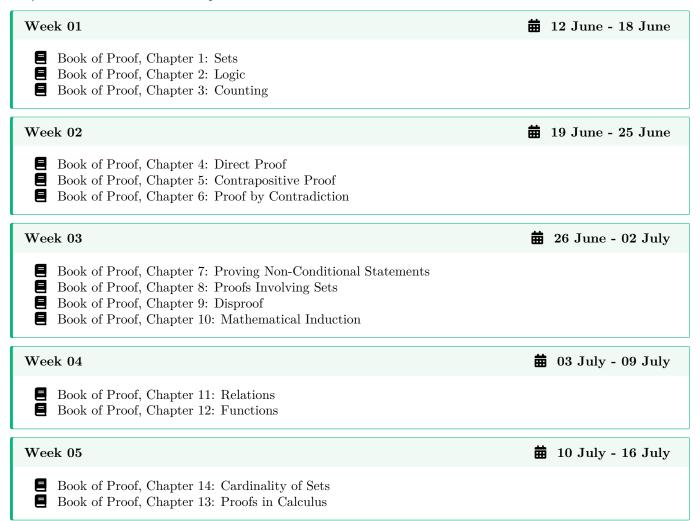

In case we need to remember a topic from calculus, we can use these playlists.

- Essence of Calculus 3Blue1Brown (2023)
- Single Variable Calculus David Jerison (2006)
- Multi Variable Calculus Denis Auroux (2007)

4 Reading Schedule

I recommend this study routine:

- 1) We read the chapter from the main book.
- 2) We watch the main playlist of the chapter.
- 3) We solve odd-numbered exercises and check their solutions at the end of the main book.
- 4) We solve even-numbered exercises.
- 5) If we cannot solve/understand an exercise, we can discuss the exercise in our Discord server.
- 6) We move on to the next chapter of the book.

5 The Next Session After This One

Real Analysis: [Application Deadline 23:59, 28 July 2023 via Google Form]

Basic Analysis I: Introduction to Real Analysis [Volume I] - Jiri Lebl (Version 6.0, 2023)
Real Analysis - Casey Rodriguez (2020, Companion playlist to the main real analysis book)
If you are admitted to Proof Techniques session, you do not have to apply for Real Analysis session again. In other words, you can directly join Real Analysis session if you wish.
