0   Motivation

- *Proof-Based Math Readings* is a free and independent online reading group where we study mathematics required in economics master's/PhD programs using an intuitive approach.
- This session of the reading group is on *Real Analysis*.

1   Prerequisites

- CGPA: 3.00/4.00 and **Book of Proof - Richard Hammack (3.3 Edition, 2022)**.
- Please use our 🔗 Application Form to join our reading group anytime.
- People who applied will be informed about their application results within a week.

2   Format

- This session will last 13 weeks from 31 July 2023 to 29 October 2023.
- We will discuss the topics/exercises that we struggle with at 🎮 Proof-Based Math Readings [Discord].
- We will not have face-to-face/online meetings due to size of the group.
- Members are expected to read the chapters, and watch the chapter videos from the book's playlist.

3   Resources [All are open-access]

3.1   Main Book and Main Book's Playlist

Basic Analysis I: Introduction to Real Analysis [Volume I] by Jiri Lebl is our main book for this session because it is well-written, well-structured, and open-access.
Casey Rodriguez's playlist is our main playlist because his narrative is just great.
