Proof-Based Math Readings

---

[*]zekiakyol.com

0 Motivation

- *Proof-Based Math Readings* is a free, independent online reading group where we study the mathematics required for economics master's and PhD programs through an intuitive approach. Active since May 2023.
- This session of the reading group is on *Large Sample Theory.*

1 Prerequisites

- Proof Techniques and Real Analysis resources below.
- Please use the 🔗 Application Form to join our reading group; you will receive a response within a week.

2 Format

- This session takes 12 weeks. We do not have face-to-face/online meetings due to the size of the group.
- Members read the main book and discuss the topics/exercises in the Proof-Based Math Readings Discord 💬.

3 Resources

3.1 Main Book and Main Book's Playlist

Elements of Large-Sample Theory - Erich L. Lehmann (1999) is our main book for this session because it is well-written and well-structured.

Jingyi Jessica Li's playlist is our main playlist because her narrative is great.

- 📓 Elements of Large-Sample Theory - Erich L. Lehmann (1999)   → Easier but doesn't contain solutions
- 📓 Elements of Large-Sample Theory - Erich L. Lehmann (1999, Errata)
- 📓 A Course in Large Sample Theory - Thomas S. Ferguson (2002) → Harder but contains solutions
- 📓 A Course in Large Sample Theory - Thomas S. Ferguson (2002, Errata)
- ▶ A Course in Large Sample Theory - Thomas S. Ferguson (2002, Playlist by Jingyi Jessica Li)
- 📓 A Course in Large Sample Theory - Thomas S. Ferguson (2002, Notes by Jingyi Jessica Li)

3.2 Supplementary

3.2.1 Large-Sample Theory

- 📓 Notes for a Graduate-Level Course in Asymptotics for Statisticians - David R. Hunter (2025)
- 🖊 Understanding Convergence Concepts: A Visual-Minded and Graphical Simulation-Based Approach - P. Micheaux, B. Liquet (2009)

3.2.2 Proof Techniques

- 📓 Book of Proof - Richard Hammack (3.4 Edition, 2025)
- ▶ Book of Proof - Richard Hammack (3.4 Edition, 2025, Playlist by Jeremy Teitelbaum)
- ▶ Book of Proof - Richard Hammack (3.4 Edition, 2025, Playlist by Michael Penn)

3.2.3 Real Analysis

- 📓 Basic Analysis I: Introduction to Real Analysis - Jiri Lebl (Version 6.1, 2024)
- ▶ Basic Analysis I: Introduction to Real Analysis - Jiri Lebl (Version 6.1, 2024, Playlist by Casey Rodriguez)
- ▶ Introduction To Metric Spaces - Paige Bright (2023)

4 Reading Schedule

- **ELST** is the abbreviation of **Elements of Large-Sample Theory - Erich L. Lehmann (1999)**.

📑 ELST, Chapter 1: Mathematical Background   **Week 01-02 📅**

  1.1 The concept of limit
  1.2 Embedding sequences
  1.3 Infinite series
  1.4 Order relations and rates of convergence
  1.5 Continuity
  1.6 Distributions

📑 ELST, Chapter 2: Convergence in Probability and in Law   **Week 03-04-05-06 📅**

  2.1 Convergence in probability
  2.2 Applications
  2.3 Convergence in law
  2.4 The central limit theorem
  2.5 Taylor's theorem and the delta method
  2.6 Uniform convergence
  2.7 The CLT for independent non-identical random variables
  2.8 Central limit theorem for dependent variables

📑 ELST, Chapter 3: Performance of Statistical Tests   **Week 07-08-09 📅**

  3.1 Critical values
  3.2 Comparing two treatments
  3.3 Power and sample size
  3.4 Comparison of tests: Relative efficiency
  3.5 Robustness

📑 ELST, Chapter 4: Estimation   **Week 10-11-12 📅**

  4.1 Confidence intervals
  4.2 Accuracy of point estimators
  4.3 Comparing estimators
  4.4 Sampling from a finite population

5 Further Readings (Optional)

📑 Asymptotic Theory for Econometricians - Halbert White (Revised Edition, 2000)
